-

16-20 Short Answer Questions

16. What is the purpose of the `<head>` tag in an HTML document?

The `<head>` tag contains meta-information about the document, such as the title, character set, linked stylesheets, and scripts. It is used to provide metadata to the browser and search engines.

17. What is the purpose of the `<!DOCTYPE>` declaration in an HTML document?

PROF

The `<!DOCTYPE>` declaration defines the document type and version of HTML being used. It helps the browser to render the page correctly by specifying the HTML standard.

18. Which HTML element is used to define the structure of a table?

The `<table>` element is used to define the structure of a table in HTML. It contains rows (`<tr>`), header cells (`<th>`), and data cells (`<td>`).

19. What is the purpose of the `alt` attribute in the `` tag?

The `alt` attribute provides alternative text for an image if it cannot be displayed. It also helps with accessibility, allowing screen readers to describe the image to visually impaired users.

20. What is the purpose of the `<footer>` tag in an HTML document?

The `<footer>` tag defines the footer section of a document or a section of a document. It typically contains information such as the author, copyright, contact details, or links to related documents.
